Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 12, 13, 18-20, and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by Morgan et al (2003/0158002). Claims 1 and 18, Morgan discloses noncircular dimples comprising edges (see figures 2A-2E). The depression of the dimple begins at the apices. Claims 2, 3, 19, and 20, all the dimple edges have the same cross sectional area and circular. Claims 12 and 23, does not further limit the ball. Claim 13, the dimples have a recessed bottom.

Allowable Subject Matter

Claims 4, 5, 21, and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3711

Claims 6-11 and 14-17 are allowed.
